

## **Adventures in Language® III Out of Program Tests**

### **Teacher Guidelines**

#### **Testing Schedule**

There are 8 ***Out of Program*** tests that are designed to be administered approximately every ten lessons.

<b>Give Test #...</b>	1	2	3	4	5	6	7	8
<b>After lesson...</b>	10	20	30	40	48	60	70	75

There are also five ***Writing for Fluency Element Rubrics***. Three of these are integrated into the lessons themselves, and two are separate, out-of-lesson assessments.

<b>Use Rubric/Script</b>	Summary	Comparison	Problem-centered Story	Thank You Letter	Problem-centered Story
<b>After lesson...</b>	17	38	with lesson 54	with lesson 71	with lesson 79

The ***Writing for Fluency Element Rubrics*** are designed to be scored as a percentage. Scoring is done using the rubric and the class recording sheet. Organization, ideas, style (voice, word choice, sentence fluency), and conventions each provide 25% of the student's score.

#### **Scoring the Writing**

Each student's writing can be scored at four different levels: emerging, basic, proficient, and advanced:

- A score of 0 or 1 for an element indicates emerging level (element not present or minimally present).
- A score of 2 or 3 for an element indicates basic level (element approaching grade level expectations).
- A score of 4 for an element indicates proficient level (element meets grade level expectations).
- A score of 5 for an element indicates advanced level (element exceeds grade level expectations).

#### **Scoring Procedure:**

Give student a score for each element on the rubric sheet. Record student scores on the recording sheet. Total the scores to determine the percentage. If a student scores 80% they are at mastery overall for that form of writing. Students who receive a score of less than 4 on any element should receive targeted remediation for that element. After remediation, students should be offered the opportunity to improve their writing.

#### **Test Design**

The ***Out of Program*** tests have been carefully written to assess the specific skills that students have mastered. The only items tested are those that the students have been introduced to and practiced at least six times in the program. The format of the items and directions reflect that of the workbook in both wording and text style.

#### **Grading and Remediation**

At the bottom of each **student test**, you'll find a table that lists each skill and the number of points that could possibly be earned for each. The table is broken down by skill so that you can accurately assess the need for remediation. To calculate a percentage for a final grade on the test, simply divide the student's total earned points by the total possible points.

At the bottom of the **recording sheet**, you'll find a similar table containing the same headings. This table shows the number of errors at which remediation of a skill is necessary. It also lists the lesson and task from the **Teacher's Presentation Book** in which that skill was first taught. Finally, it shows the lesson number and part in the Student Workbook where students can practice the skill again. In most cases, two lesson parts have been suggested. Use your professional discretion in assigning remediation tasks.

### Test Administration

**Out of Program** tests should be administered in a way that closely resembles daily activities. Have students clear their desks and put their pencils down. Explain that they will be taking a test that will help you understand what they have learned and what they still need help with. Students are to complete the test part-by-part.

A script has been written for each **Out of Program** test and for the **Summary** and **Comparison** writing tests. These scripts reflect the structure and wording of the daily lessons.

If a student is working very slowly, you do not have to hold up the whole class. Tell that student to move on with the class and give them time after the test is finished to complete the incomplete parts.
